

OAK FLOORING MANUFACTURER

— Created for generations —

ABOUT US

LEARN MORE ABOUT OUR COMPANY

The history of the company dates back to 1956 when Józef Matuszkiewicz, the doyen of the family, founded a sawmill to provide services for local residents.

The next generation of the owners of the company, Władysław i Dorota Matuszkiewicz, in the spirit of respecting the family tradition of reliability and based on the experience gained, they expanded the plant on an area of 5ha and carried out technological modernization, adapting production to international standards.

The MAT-TAR company relies on high-quality sawmill raw material from the Polish State Forests. The plant has a modern machinery park and 30 drying rooms from renowned manufacturers. We employ approximately 240 experienced employees.

Thanks to many years of work and knowledge of our specialists, MAT-TAR is today one of the largest producers of wooden floors in Poland.

Our products are adapted to the requirements of international markets, which allows us to export on a wide scale.

One of the company's main priorities is care for the natural environment.

The entire production process, from harvesting wood to the sale of the finished product, is monitored for compliance with the principles of responsible forest management.

We invest in modern technologies, which allows us to create products at the highest world level.

This is confirmed by the FSC (**Forest Stewardship Council**) certificate confirming that the products are made from raw materials from proven sources. FSC certified products ensure that they do not harm the natural environment.

MAT-TAR products also meet European CE safety requirements.

ART COLLECTION

Created for interior designers and architects. Finishes with an exceptionally natural effect (oil or UV lacquer) were used here, ensuring durability and resistance to damage.

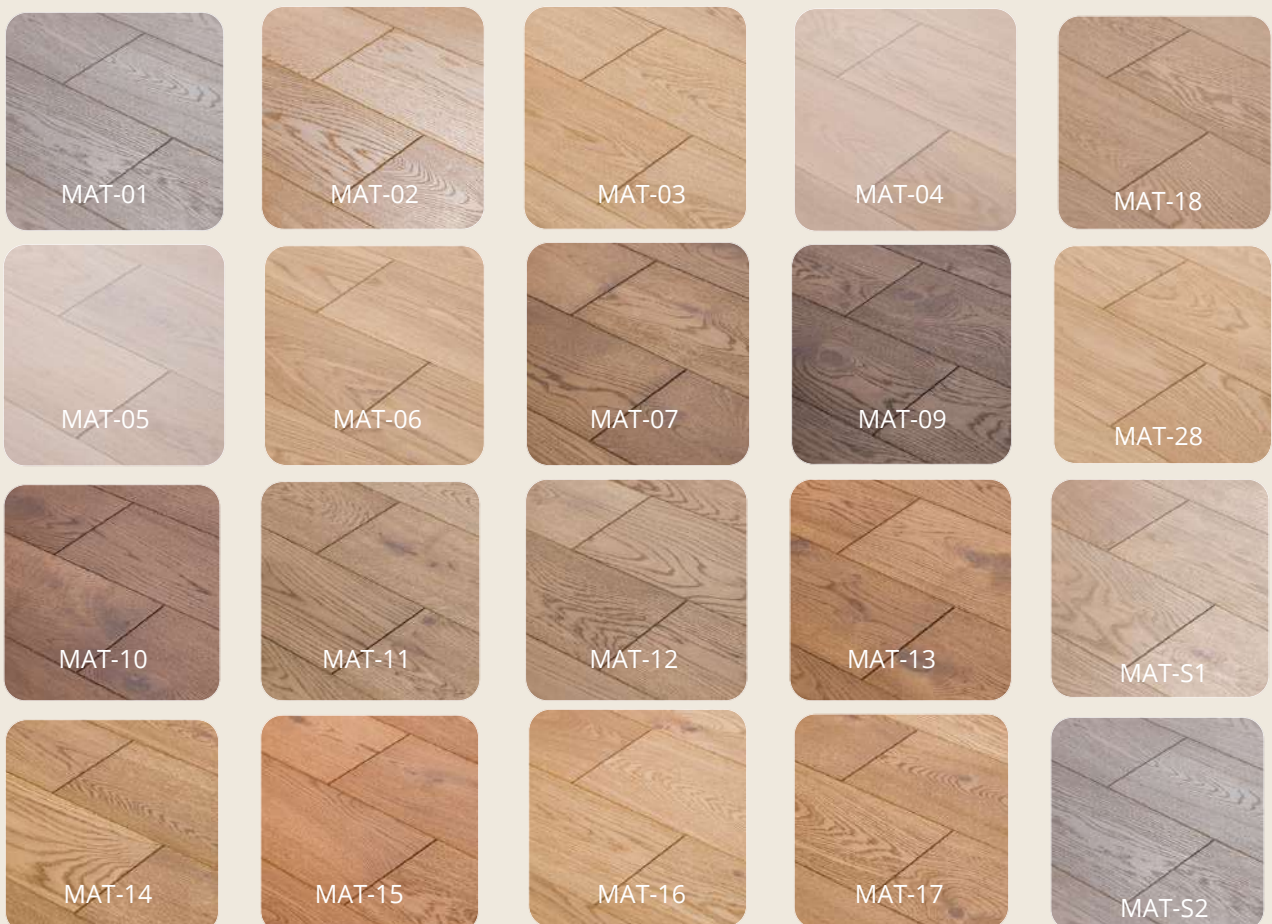

ART COLLECTION

OXY COLLECTION

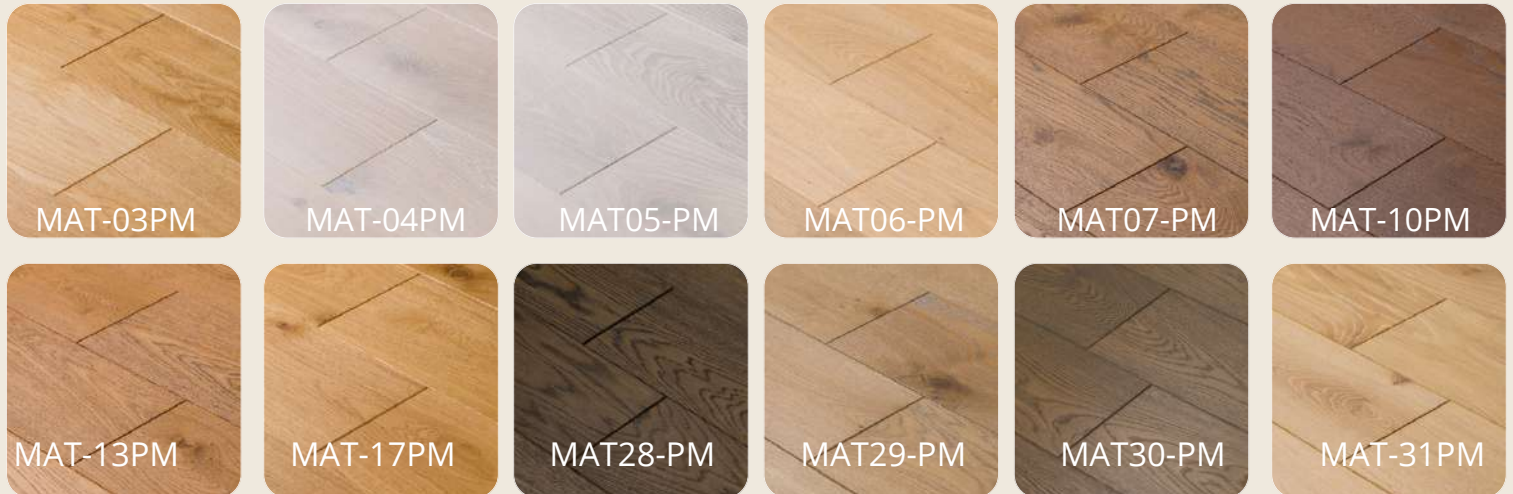

Floors finished with oxidative oil are extremely natural, highlight their values, and are pleasant to the touch.

OLD COLLECTION

The use of a brush allows you to sharpen the natural structure of the board. It highlights the wood grain and provides a unique effect.
UV oil-wax finish.

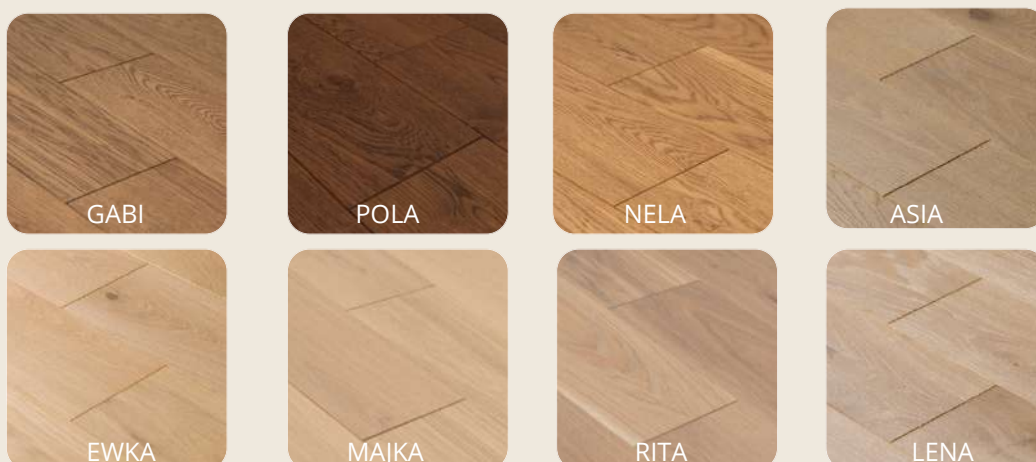

CHARACTER COLLECTION

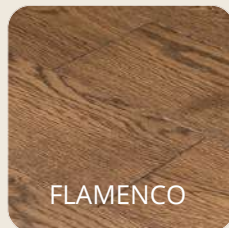

UV oil waxes perfectly protect the wood, emphasize the natural beauty of the boards, as well as give an unusual, clear tone.

This collection adds character and depth to arrangements in an original way.

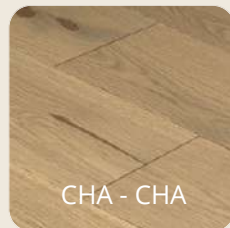

DANCE COLLECTION

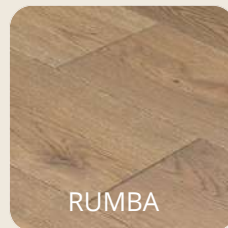

Colors dictated by the newest trends available
in UV Lacquer mat or UV oil.

NEW COATING SOLUTION!

OLD COLLECTION EXCLUSIVE from MAT-TAR offers incredible functionality and innovation!

The varnish ensures durability and ease of maintenance, while wax oil naturally highlights the features of the wood, preserving its natural structure. Our revolutionary coating combines these properties to provide exceptional protection for your wooden floor. MAT-TAR wooden floors have always stood out a wide range of colors! Now all colors from the OLD collection are available in a new hybrid coating!

The graphic features a dark green forest background. At the top center is the 'OLD COLLECTION EXCLUSIVE' logo. Below it are three columns of color names, each with a title and a list of color codes. The columns are: HOME (DOSTĘPNE W KOLORACH), DESIGN (DOSTĘPNE W KOLORACH), and PROJECT (DOSTĘPNE W KOLORACH). At the bottom center is a green rounded rectangle containing the website address 'www.mat-tar.pl'.
